1. Project Overview

The current IT procurement process for standard laptops involves manual configuration and task handling, which can cause delays, oversight, and additional manual effort. The proposed solution uses ServiceNow Flow Designer to automatically create a Catalog Task after the Standard Laptop request is approved, populate the task details, and assign it to the Hardware group.

2. Customer Journey Map

The journey map follows the supplied template structure: steps, interactions/touchpoints, positive and negative moments, opportunities, and goals & motivations.

Stage	What the user	Interactions /	Positive moment	Negative	Goal / Motivati	Opportun
-------	---------------	----------------	-----------------	----------	-----------------	----------

	experiences	Touchpoints	s	moments	on	ity
Entice / Request	User needs a standard laptop and opens the ServiceNow Service Catalog.	ServiceNow → Service Catalog → Hardware → Standard Laptop.	Clear service option is available.	User may be unsure where to start.	Help me request a standard laptop quickly.	Make the Standard Laptop catalog item easy to discover.
Order	User selects Standard Laptop and chooses Order Now.	Standard Laptop catalog item; Order Now.	Simple ordering path.	Manual steps can create uncertainty.	Help me submit the correct request.	Use a standard catalog item and clear request information.
Approval	Request is submitted and waits for approval.	Request record; Approvers section.	Approval gives confidence that the request is authorized.	Waiting for approval can delay fulfillment.	Help me know whether my request is approved.	Use an approval-driven automation trigger.
Fulfillment / Configuration	After approval, a Catalog Task is automatically created for laptop configuration.	Flow Designer; Catalog Task; Hardware assignment group.	No manual task creation is needed.	Without automation, configuration tasks may be missed or delayed.	Help me get the laptop configured promptly.	Automatically create and assign the task to Hardware.
Status / Completion	User or IT team can inspect the	Requested Item → Catalog	Task status and	Manual follow-up may	Help me understand what	Expose clear task status and

	Requested Item and Catalog Tasks.	Tasks; task status and assignment.	assignment are visible.	otherwise be required.	happens next.	ownership .
Extend	The completed workflow supports a more consistent procurement experience for future requests.	ServiceNow records and workflow history.	Repeatable process.	Inconsistent manual handling can return if automation is not maintained.	Help me avoid repeated delays.	Monitor the flow and standardize the process.
