1. Project Overview

The current IT procurement process for standard laptops involves manual configuration and task handling, which can cause delays, oversight, and additional manual effort. The proposed solution uses ServiceNow Flow Designer to automatically create a Catalog Task after the Standard Laptop request is approved, populate the task details, and assign it to the Hardware group.

11. Traceability to Supplied Templates

Requested Artifact	How it is represented in this document
Customer Journey Map	Section 2 – journey stages,

	interactions/touchpoints, positive/negative moments, goals and opportunities.
Data Flow Diagram	Section 3 – Level-0 logical flow and data movement table.
User Stories	Section 4 – User Type, Epic, Story ID, Story/Task, Acceptance Criteria, Priority and Release.
Solution Requirements	Section 5 – Functional and Non-functional Requirements.
Technology Stack Canvas	Sections 6–8 – component/technology table, application characteristics, and architecture canvas.
